The increase in vehicle sales over the second quarter of 2023 was mainly due to the increase in delivery volume, partially offset by the lower

average selling price as a result of changes in product mix and user rights adjustments since June 2023. The increase in vehicle sales over the first quarter of 2024 was mainly attributable to an increase in delivery volume.

- **Other sales** in the second quarter of 2024 were RMB1,766.3 million (US\$243.1 million), representing an increase of 11.3% from the second quarter of 2023 and an increase of 15.6% from the first quarter of 2024. The increase in other sales over the second quarter of 2023 was mainly due to the increase in sales of parts, accessories and after-sales vehicle services, and provision of power solutions, as a result of the continued growth in the number of users, and partially offset by a decrease in revenue from sales of used cars. The increase in other sales over the first quarter of 2024 was mainly due to (i) the increase in sales of parts, accessories and after-sales vehicle services, provision of power solutions and other products, as a result of the increased sales of embedded products and services offered together with vehicle sales, and continued growth in the number of users; and (ii) the increase in sales from rendering of technical research and development services.

Cost of Sales and Gross Margin

- **Cost of sales** in the second quarter of 2024 was RMB15,757.3 million (US\$2,168.3 million), representing an increase of 81.4% from the second quarter of 2023 and an increase of 67.3% from the first quarter of 2024. - **Vehicle margin** in the second quarter of 2024 was 12.2%, compared with 6.2% in the second quarter of 2023 and 9.2% in the first quarter of 2024. The increase in vehicle margin from the second quarter of 2023 was mainly attributable to decreased material cost per unit, and partially offset by lower average selling price as a result of the user rights adjustments since June 2023. The increase in vehicle margin from the first quarter of 2024 was mainly due to the decreased material cost per unit.

Operating Expenses

- **Research and development expenses** in the second quarter of 2024 were RMB3,218.5 million (US\$442.9 million), representing a decrease of 3.8% from the second quarter of 2023 and an increase of 12.4% from the first quarter of 2024. Research and development expenses remained relatively stable compared with the second quarter of 2023. The increase in research and development expenses over the first quarter of 2024 was mainly due to the incremental design and development costs for new products and technologies as well as the increased personnel costs in research and development functions.
